# welters™ organisation worldwide

– the Pioneer Cemetery Design and Build Company with over 20 years market service and expertise celebrates yet another year of leadership in concept manufacture, installation and management. welters™ experience and success combines as a result of ongoing commitment to invest in research and development.

Cemetery Village™ - Project Open Day

welters™ provide comprehensive 'in house' architectural services specialising in cemetery architecture with complete specialist design and planning, manufacturing, installation and construction services.

Local Authority Cemetery Services, following the Second World War and the growth of cremation numbers, became

dissipated and the will, knowledge and dedication to conceive, create and implement effective, desirable and financially viable Cemetery Services faded into insignificance in the face of the sanitised 'conveyor' solution that for the time being became, and to some extent still is, popular.

There is a lot of talk about change. The government wants change, ever increasing variety and partnerships. We talk about forward planning and innovation, but generally, there is still not a lot happening. We believe that change needs a kick start, and that great vision is required in this modern day of computers and disposable culture to improve the quality, the variety and artistic inspiration of our products and services as future generations will very soon have nothing to be inspired by from this period.

Chapel Restoration and Interior Niche Installation - Project Open Day

welters™ organisation, with the thorough awareness and understanding of the emotional and cultural requirements of the bereaved and the legal, management and technical ability to provide excellent solutions and at all times have continually expanded their full range of in house services.

welters™ have carefully moulded the development of the business to apply to the specific

and broad ranging issues affecting the client base. We have learned that because we have worked hard to manufacture all of our products and develop all of the skills required 'in house', we find more and more customers benefiting from our 'complete package service ability'. From architectural and planning through to bespoke scheme design, product manufacture/supply and complete installation, with PR and marketing support services also being very popular.

Our customers are experiencing direct benefits where it counts, like having ultimate control over project brief, specification and aesthetics based on our detailed proposals. They are utilising the benefits of dealing with one company who has specialist experience and ability in all of these areas which also gives them economies of scale and the ability to instruct us on single supplier

Cremated Remains Niche Interment Installation - Project Open Day

basis where necessary.

welters™ systems and ability to specify multi modular and varying finish solutions facilitate pre-selling with zero environmental impact and no additional drainage requirements giving clean, safe, space saving, UK specification LACO compliant enhanced service provision options in any location without disturbing existing remains and no, or low ongoing maintenance cost burden making it a viable priced solution for the bereaved.

All ideas, solutions, manufacturing and 24/7 back up support essentially must be generated from within the company and cannot, be structured from a 'mis-mash' of sub-contracted 'bit parts' with no dedication, inadequate knowledge or control.

The development of an environment to embrace culture, emotion and spirituality through excellent design and technical performance is an art form in its own right. welters™ have perfected these skills, linked with performance design which over many years has resolved and overcome almost every conceivable land use issue from sub water tablet construction to re-use and contaminated status.

Good environmental solution is inextricably linked with economic viability and the true and fundamental requirement and responsibility of mankind to respect and remember its dead.

welters™ mission continues to be to research and develop inspirational and classic designs, higher quality products, space saving and safe solutions for cost effective supply and installation.
