Crematoria Memorials

Facilities for memorialisation and the
interment of cremated remains

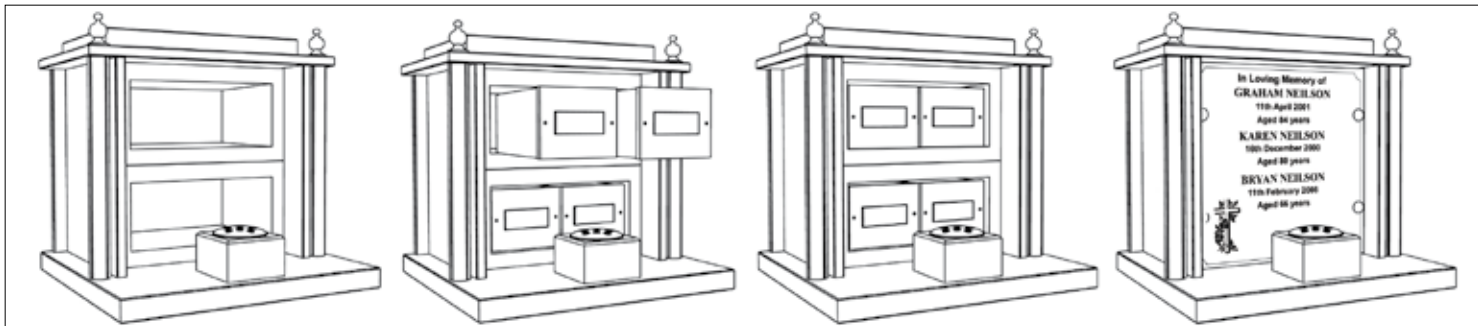

Majestic Memorial Mausolea

The Majestic Memorial Mausolea is a system which can be specified with a range of materials ranging from stainless steel and brass to granite and marble of a variety of colours. Any stone components are manufactured from locally quarried Cumbrian and Scottish sources.

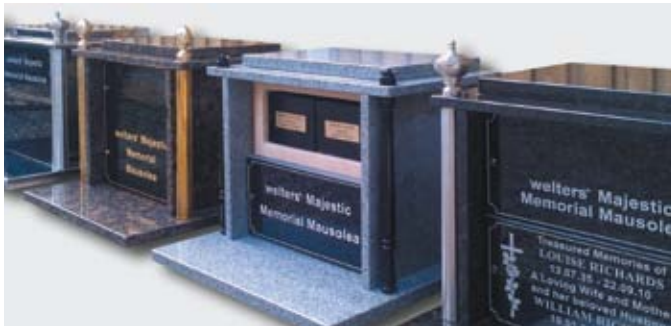

The Majestic Memorial Mausolea provides space for 4 welters bespoke cremated remains caskets.

The front tablet for inscription can be fitted either in one large piece, or two separate tablets.

Example installation of Majestic Memorials

Artists impression of fully developed Majestic installations area

Stainless Steel Keepsake Door

The single granite tablets on the Majestic housings can be interchanged with stainless steel doors if requested. The niche can then be utilised for the secure display of personalised keepsakes.

Each door has a key for security and is fronted with toughened glass.

Cremation Colonnade

The entrance to the Cremation Colonnade is spanned by a decorative stainless steel Portico of Peace™ arch incorporating doves, leaves and butterflies.

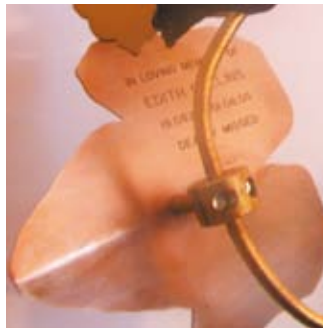

Arrangements of cremated remains interment niches are fitted into the brick wall giving the opportunity for tablet inscription.

The reflective Tree of Life™ panels add depth and light to the colonnade, transforming the area into a refreshing, peaceful location.

Individual doves, leaves and butterflies can be purchased separately and inscribed with a special message. These can then be 'clipped on' to the branches of either the Portico of Peace™ arch or the Tree of Life™ features.

A row of stainless steel keepsake niches are available on each niche arrangement, giving the opportunity for the secure storing of keepsakes and artefacts.

Tree of Life™ Reflective Feature

The Tree of Life™ Reflective Feature is made from stainless steel set against a durable reflective panel and frame.

The installation is designed to add interest and design to the Cremation Colonnade as well as adding light and space through the reflective panels.

Additional birds and leaves can be fixed to the 'branches' of the Tree of Life™ Reflective Feature. These embellishments can be inscribed with personal messages.

Portico of Peace™ Entrance Arch

The Portico of Peace™ Entrance Arch is an attractive focal point of the Cremation Colonnade. The decorative stainless steel doves and leaves reflect the light, shimmer and move gently with the breeze.

As with the Tree of Life™ Reflective Feature, additional birds and leaves can be fixed to the 'branches' of the Portico of Peace™ Entrance Arch allowing personal memorialisation.

Polygon Tower Niche Repository

The Polygon Tower is a circular niche repository enabling high volume cremated remains interment within a small footprint.

The tower is made from attractive natural stone and granite with stainless steel features for further commemoration.

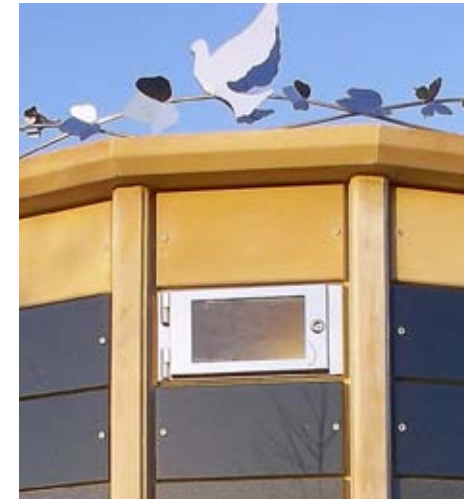

Polygon Niche Repository Tower

*with doves and leaves commemorative
tracery*

Each niche position can accept up to two welters® bespoke cremated remains caskets.

The granite front tablets of the niches can be interchanged with stainless steel doors if requested. The niche can then be utilised for the secure display of personalised keepsakes.

Each door has a key for security and is fronted with toughened glass.

Birds, Leaves and Butterflies

The tower is crowned with a stainless steel tracery adorned with birds, leaves and butterflies. Additional birds, leaves or butterflies can be purchased as a commemorative item and fitted the tracery with inscribed with personal messages.

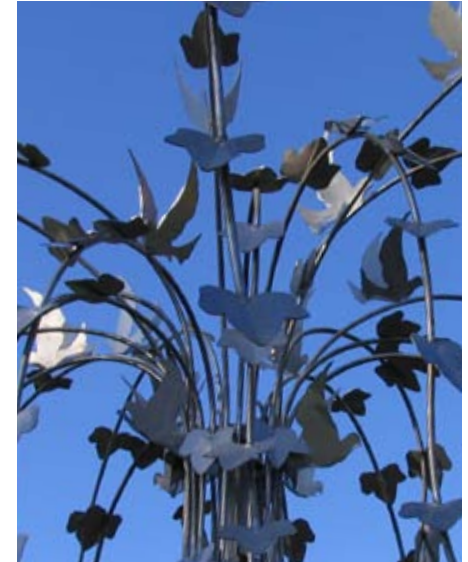

welters® Tree of Life™

The fountain can be mains or optionally solar powered. The feature responds to the environment around it stimulating multi sensory and spiritual emotions - you can see it, hear it and feel the mist in the breeze as you walk around.

The fountain Tree of Life feature incorporates the ability to add memorialisation in the form of inscribed leaves and birds which can be affixed to the gently swaying branches.
